JROTC

Manufacturing

Masonry

Carver Vocational-Technical High School is a diploma awarding, career-technology center that is fully certified and accredited. Students choose a career pathway during the 8th grade choice process , although the ir selection is based on seat capacity. Students are enrolled in coursework that meets all Maryland high school diploma requirements, as well as the technical and career development pathway that meets MSDE completer sequences. Thousands of Carver graduates serve the Baltimore community in leadership roles as well as entrepreneurship, government service, and technical trades. Our goal is to equip our graduates to be successful in the world of work or in college.

2201 Presstman Street

Baltimore, MD 21216
